

Applikation Server

Thursday, 01 February 2007

We can offer everything from simple Eggdrops and Bouncer, over remote shells, up to your own managed Servers.

Even for unusual requirements we'll find just the right solution for you!

Application Server resp. Services are as different as your requirements. That also affects the effort in maintenance and the required system resources.

Thus we apologize, that we can't make an offer without a prior needs assessment

Just call us or send us an EMail.

We'll be glad to consult you!
